SPRUNG...FROM SPRINGS

The History of Tachi-S Engineering

Tachi-S Engineering U.S.A.(now Tachi-S North America) grew out of humble beginnings. Our company's roots were planted in 1954, with the founding of the Tachikawa Spring Co. in Tokyo where we made springs for automotive seats.

As the company grew, it evolved into Tachi-S Co., Ltd. and expanded its product line to include automotive seats, frame assemblies, seat mechanisms, foam, soft trim and combining all of these components into complete seat systems.

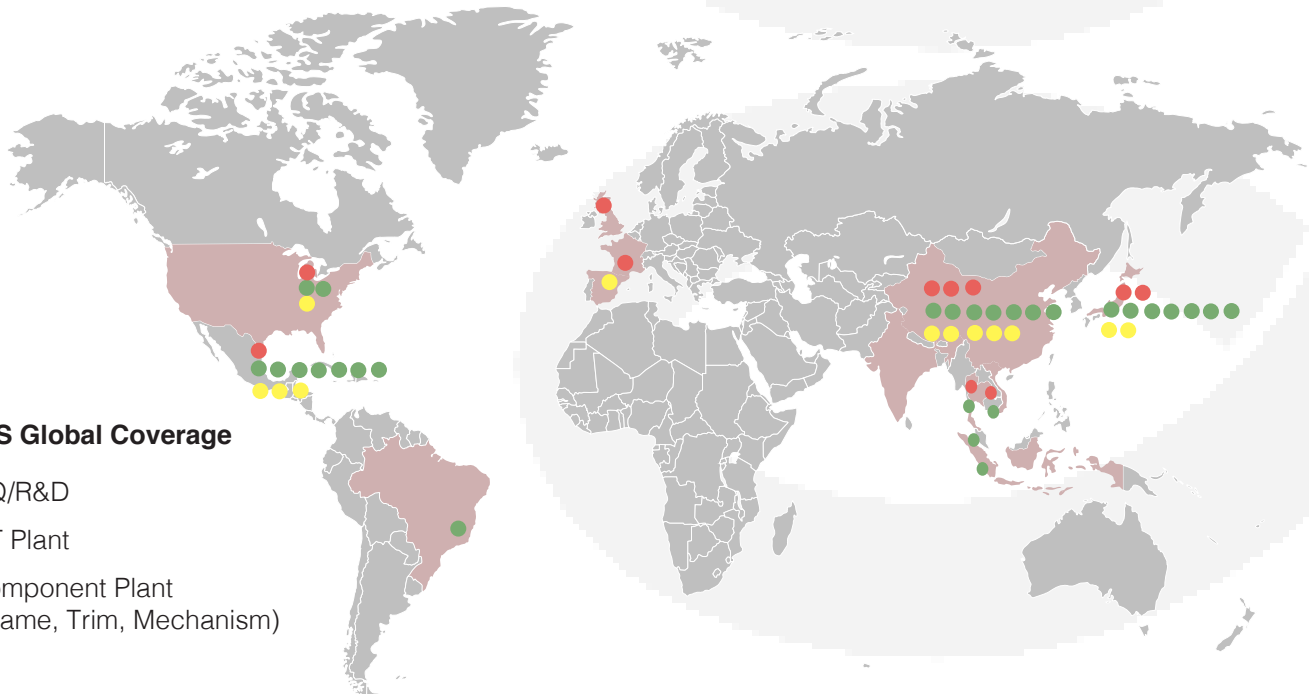

Continued growth positioned the company to expand overseas to North America and in 1986, Tachi-S Engineering USA, Inc. was established as a 100% subsidiary focused on developing and supporting the joint venture companies of Tachi-S Co., Ltd.

Our current customer list includes various OEM's, as well as Tier 1 & Tier 2 suppliers, and this list continues to grow as we expand our business in the U.S. and North America. This expansion also includes several partnerships and joint ventures including Setex, Inc., TF Metal and Technotrim, Inc.

Tachi-S Global Coverage

- HQ/R&D
